

Count Of All Subarrays With Zero Sum

```
def countZeroSubarray(arr):  
    freq = {0: 1}  
    ans = 0  
    prefix = 0  
    for ele in arr:  
        prefix = prefix + ele  
        if prefix in freq:  
            ans = ans + freq[prefix]  
            freq[prefix] = freq[prefix] + 1  
        else:  
            freq[prefix] = 1  
    return ans  
  
arr = [2, 8, -3, -5, 2, -4, 6, 1, 2, 1, -3, 4]  
print(countZeroSubarray(arr))
```
