## Sieve of Eratosthenes

Given a number n, print all primes smaller than or equal to n. It is also given that n is a small number.

## Example:

**Input**: n = 10 **Output**: 2 3 5 7

Input: n = 20

**Output:** 2 3 5 7 11 13 17 19

The sieve of Eratosthenes is one of the most efficient ways to find all primes smaller than n when n is smaller than 10 million or so

Following is the algorithm to find all the prime numbers less than or equal to a given integer *n* by the Eratosthene's method:

When the algorithm terminates, all the numbers in the list that are not marked are prime.

## **Explanation with Example:**

Let us take an example when n = 50. So we need to print all prime numbers smaller than or equal to 50.

We create a list of all numbers from 2 to 50.

|    | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 |
|----|----|----|----|----|----|----|----|----|----|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |

According to the algorithm we will mark all the numbers which are divisible by 2 and are greater than or equal to the square of it.

|    | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 |
|----|----|----|----|----|----|----|----|----|----|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |

Now we move to our next unmarked number 3 and mark all the numbers which are multiples of 3 and are greater than or equal to the square of it.

|    | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 |
|----|----|----|----|----|----|----|----|----|----|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |

We move to our next unmarked number 5 and mark all multiples of 5 and are greater than or equal to the square of it.

|    | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 |
|----|----|----|----|----|----|----|----|----|----|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |

We continue this process and our final table will look like below:

|    | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10              |
|----|----|----|----|----|----|----|----|----|-----------------|
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20              |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30              |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40              |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | <mark>50</mark> |

So the prime numbers are the unmarked ones: 2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47.
